**What is preventing
you from co-creating
more with persons
outside of your own
field of expertise?**

0 1 7

Resources

lack of contacts

language

Time

own language

Why would they want to

acceptance of expertise

What would your dream outcome be if you organised a co-creation event?

0 1 8

a commitment to the uptake of its results

diversity of methods

Better solutions

policy recommendation

inspiration

resolving opposing positions, conflict

empowerment

unprecedented interdisciplinary collaboration

Inclusive solutions

A real shift in a research project

praxis in an interdisciplinary and transdisciplinary sense

diversity of ideas

Happy stakeholders

high levels of participation by people from different backgrounds

What do you think could be the value of engaging with citizens on research and innovation?

0 2 9

Citizens could raise awareness on their needs for how technological solutions should be designed

Citizens could challenge how research understand a problem

All of the above

Citizens could help come up with new ideas

Citizens could help develop research questions

I'm not sure

Do you think gender and diversity is an issue in nanotechnology?

0 1 8

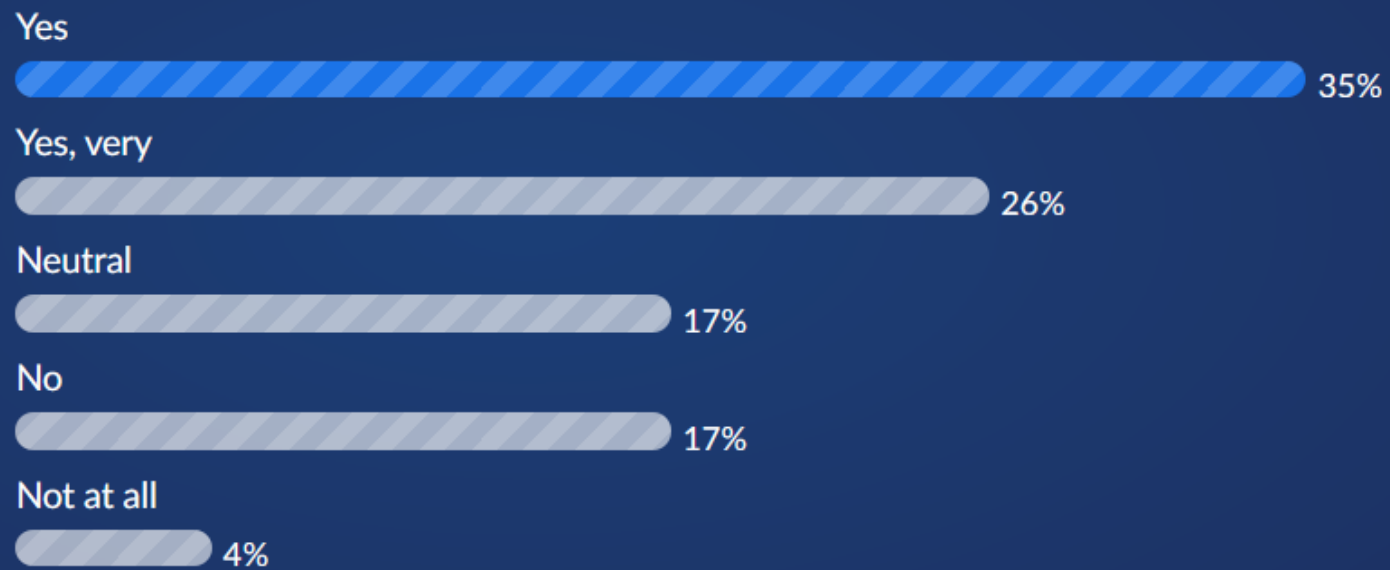

Yes

No

Would you say that your organisation is representative in terms of gender and diversity? 0 2 3

What do you take with you from today's session?

0 1 3

Gender and diversity are important and maybe STEM can learn from Medicine and Biomedicine areas and research which appears to be several decades further down the road to achieving gender balance, and is improving in diversity in general.

still no "incentives" for participants from civil society....it should become more clear or also should set in focus, what is the added value - also for the participants

No woman/women, no panel. I like that one!

Inspiration

The diversity approach

co-creation

Horizon Europe seems to imply a turn to gender mainstreaming and co-creation as far as KETs (eg nano) are concerned

diversity and inclusiveness make a difference!

The term intersectionality

Gender and diversity is crucial
